ULTRASOUND PROTOCOL

Routine pregnancies will receive a total of three (3) Ultrasounds during the time of Prenatal Care.

- ***First Ultrasound*** during the Initial Visit to determine gestational age.
- ***Second Ultrasound*** at 20-22 weeks for fetal anatomy (if possible), and to check fetal organs.
- ***Third Ultrasound*** at 36 weeks to check fetal position.

Most insurance will cover one ultrasound per pregnancy. Your diagnostic copayment or coinsurance may apply for these services.

Please note, if during your pregnancy we feel that is necessary to do additional ultrasounds or further testing you will be advised at the time of your visit.
